Since 2009, The Business Harbour has been providing Payrolling services to consultants and companies. We offer consultants the freedom to work as freelancers with the security and social cover of an employee. Payrolling services give companies legal access to the expertise they need for as long as they need it.

Sharing our offices and making it easier for consultants and companies to have a workspace in a professional environment bears witness to our desire to make work easier and more flexible.

Built in 1911 our building was home to the Swiss painter Ferdinand Hodler during his final years. We seek to maintain the artistic value of the premises by organising regular exhibitions of local artists. We are located on the quayside, next to the famous Bains des Pâquis and opposite the Jet d'Eau. We are just a few minutes walk from the Cornavin train station and a stone's throw from the Kempinski hotel and car park. There are also plenty of shops and restaurants in the area. You can get to the Left Bank without worrying about traffic jams thanks to the lake boat that runs every 10 minutes.

We offer to sublet an office in our workspace, with a balcony overlooking the harbour. We would be more than happy to discuss the terms and conditions with you. Please call us to make an appointment on:
